PROFILE

Data Analyst with hands-on experience in **data analysis, data visualization, business intelligence, and machine learning**. Skilled in **Python, SQL, Power BI, Excel, Pandas, Scikit-learn, and DAX**, with experience in data cleaning, preprocessing, exploratory data analysis, dashboard development, and predictive modeling. Gained practical experience through **DEPI and NTI training programs**, working on real-world datasets and end-to-end data projects.

EDUCATION

Mansoura Universty <i>Computer Engineering</i>	09/2024 – Present Egypt, Mansoura
--	--------------------------------------

PROFESSIONAL EXPERIENCE

Digital Egypt Pioneers Initiative - DEPI <i>Data Analyst trainee</i> • Data cleaning and analysis using Excel and Python • Built interactive dashboards using Power BI • Extracted insights to support business decisions • Worked on real-world data projects	11/2025 – Present hybrid
--	-----------------------------

National Telecommunication Institute - NTI <i>Advanced Data Analytics trainee</i> • Applied Python, NumPy, Pandas, and Scikit-learn for data analysis and machine learning. • Performed data preprocessing, feature engineering, model evaluation, and visualization. • Developed interactive Power BI dashboards across multiple business domains, including HR, Banking, and Healthcare. • Worked on practical projects using real-world datasets and developed end-to-end ML workflows.	07/2026 – 08/2026 Mansoura
--	-------------------------------

SKILLS

• Python	• SQL	• Excel
• Data visualization	• Pandas	• Numpy
• Deployment	• Power BI	• Machine Learning

COURSES

Supervised Machine Learning: Regression and Classification <i>DeepLearning.AI</i>	10/2025 – 11/2025 Remote
AI and Machine learning <i>Sprints x Microsoft</i>	07/2025 – 08/2025 Remote

PROJECTS

Emergency-Wait-time

tools(python- SQL - Power BI)

- Analyze patient journey from registration to medical consultation
- Identify **bottlenecks** causing delays
- Evaluate the impact of **staff availability (doctors & nurses)**
- Measure hospital performance using key KPIs

Football Injury Analytics & Prediction

tools(Python, Power BI, Scikit-learn, KNN, Gradio)

- **Data Analysis** – Analyze football player injury data and risk factors.
- **Data Preprocessing** – Clean, encode, scale, and engineer features.
- **Machine Learning** – Build an injury prediction model using KNN.
- **Power BI Dashboard** – Visualize injury trends, player statistics, and risk factors.
- **Model Deployment** – Deploy the prediction model using Gradio.

Impact of Social Media on Mental Health

Tools (Python- Power BI-DAX- SQL-Excel)

- **Data Collection** – Combine survey and Kaggle datasets for population health analysis.
- **Data Preprocessing** – Clean, transform, and standardize raw survey data using Python.
- **Data Modeling** – Design a normalized **Star Schema** for scalable analytics.
- **SQL Analysis** – Query and validate data using **PostgreSQL/Supabase**.
- **Dashboarding** – Build interactive **Power BI dashboards** to analyze social media and mental health trends.
